EXPERIENCE

Branding Brand

Software Engineer II | Aug 2022 - May 2024

- Supported a Fortune 500 client's engineering teams directly to build out enterprise level features and applications to replace legacy code and software
- Led and assisted in knowledge transfers, sprint plannings, defect remediations, and overall development
- Developed meticulously for accessibility, converted projects to monorepos, ran and resolved security threats, and picked up new technologies on the go
- In addition to unit tests and code reviews, took part in QA and regression testing

Credit One Bank

Frontend Engineer II | Jan 2022 - Aug 2022

- Led initiative w/ stakeholders to build an internal management and audit application of employee resources that provides an outlet to view and create reports, manage access, and perform certifications.
- Led initiative to replace legacy application that records and processes vital customer information/requests, provides statistics and audit history, and improve productivity of servicing agents.
- Engaged in review boards and discussions with stakeholders and product owners, overview of technical procedures, architecture and system context diagrams, and addressed security/implementation concerns.
- In addition to primary job function responsibilities, designed and implemented API for internal use, created UI/UX designs when needed, setup CI/CD environment for projects in OpenShift.

Boomer Naturals/ZimmiTech

Senior Full-Stack Developer | Sept 2020 - Dec 2021

- Led a cross-functional team responsible for the full software development life cycle, from conception to deployment to create and continually evolve the feature-set of SPA's and other in-house software.
- Used Gatsby and Shopify's GraphQL API to build new web applications that resulted in a 250% increase in conversions, majorly reduced page speed, and better brand identity.
- Triaged any top level issues elevated on projects in multiple GitHub repositories as well as handling code review for any pull requests to ensure high code quality & future maintainability.

LVSS Consulting Corporation

Senior Full-Stack Developer | June 2014 - Aug 2020

- Managed the incorporation and development of e-commerce into the business model which had seen revenue surpass $1 million/yr.
- Designed, developed, and deployed responsive & functional web applications and features.
- Integrated 3rd party API with our own platform and released/maintained API features for our consumers.

EDUCATION

San Francisco State University

B.S. Computer Science
Emphasis: Algorithms and theory of computing
